Improvement Backlog

Identified Issues

1. Missed relevant candidates (low recall)
2. False positives in generic resumes
3. Weak handling of non-technical roles

Planned Improvements

1. Improve skill extraction accuracy
2. Use better semantic models (BERT, SBERT)
3. Add domain-specific weighting
4. Enhance experience relevance scoring
5. Introduce feedback learning loop

Future Enhancements

- Train custom ML model
- Add recruiter feedback integration
- Improve bias detection
