# ATS Testing Report

## Objective

To evaluate system performance across different job roles and candidate profiles.

## Test Categories

- Technical roles
- Non-technical roles
- Fresher resumes
- Senior profiles

## Methodology

- Selected sample job descriptions
- Compared AI predictions with manual evaluation
- Used similarity threshold of 0.6

## Observations

- High accuracy for technical roles
- Moderate accuracy for non-technical roles
- Better performance on experienced candidates

## Limitations

- Keyword dependency
- Limited contextual understanding
