Day 66 – Demo Script

Objective

Demonstrate the complete Zecpath AI hiring workflow from resume upload to final hiring decision.

Step 1 – Introduction

"Welcome to the Zecpath AI Hiring Platform demonstration.

Today I will show how the system automates the complete recruitment process using Artificial Intelligence."

Step 2 – Resume Upload

Upload a sample resume.

Explain that the Resume Parser extracts:

- Skills
- Education
- Experience
- Projects

Step 3 – ATS Scoring

Show the ATS score.

Explain that semantic matching compares the resume with the job description.

Step 4 – Screening AI

Run the screening interview.

Show the generated score and transcript.

Step 5 – HR Interview AI

Explain that the HR AI evaluates:

- Communication

- Confidence
- Fluency
- Behavioral responses

Step 6 – Technical AI

Display the technical assessment.

Show coding and technical evaluation scores.

Step 7 – Behavioral & Integrity Analysis

Show:

- Focus score
- Attention level
- Integrity risk
- Malpractice flags (if any)

Step 8 – Final Decision

Display the aggregated scores.

Example:

- ATS: 85
- HR: 82
- Technical: 88
- Behavior: Low Risk

Final Decision:

Selected

Step 9 – Hiring Report

Open the recruiter report.

Highlight:

- Candidate strengths
- Weaknesses
- Recommendation

- Final score

Step 10 – Business Impact

Explain the benefits:

- Faster hiring
- Reduced manual effort
- Consistent evaluations
- Explainable AI decisions
- Scalable recruitment process

Conclusion

"Zecpath AI demonstrates an end-to-end intelligent hiring workflow that automates resume screening, interviews, behavioral analysis, and hiring decisions while improving efficiency and consistency."
