Day 68 – Bug Fix Report

Title

Final Bug Fix & Optimization Report – Zecpath AI

Objective

Ensure the AI hiring system is stable, consistent, and ready for production deployment by fixing remaining issues and improving reliability.

Bugs Fixed

Issue	Fix Applied
Invalid scores (>100)	Score normalization
Negative values	Minimum score validation
Null or missing inputs	Safe fallback values
API response inconsistency	Unified response format
Retry loops	Retry limit implemented

Edge Cases Handled

Edge Case	Solution
Empty responses	Default values assigned
Missing candidate fields	Safe validation
Very large inputs	Input trimming
Low-quality interview audio	Retry or skip logic

Performance Improvements

- Reduced response latency
- Stable score aggregation
- Improved API consistency
- Better error handling

- Reliable decision logic

Before vs After

Before

```
{
    "score": -15,
    "decision": "Selected"
}
```

After

```
{
    "score": 0,
    "decision": "Rejected",
    "status": "release_ready"
}
```

Final Status

- Bug fixes completed
- Edge cases handled
- APIs standardized
- System ready for release

Conclusion

The Zecpath AI Hiring System has been optimized for stability and is ready for final deployment.
