Day 70 – Knowledge Transfer Completion

Objective

Transfer project knowledge, documentation, and codebase for future development and maintenance.

Code Walkthrough

- ai_core → AI Engines
- api → REST APIs
- behavior_ai → Behavioral Analysis
- integrity_ai → Integrity Detection
- observability → Monitoring & Logging
- security → Authentication & Encryption
- tests → Validation Scripts
- demo → Demo Pipeline

System Overview

The hiring system processes every candidate through multiple AI modules:

Resume

Decision Engine

↓

Final Report

Handover Checklist

- Codebase Delivered
- Documentation Shared
- API Documentation Explained
- Demo Dataset Included
- Deployment Guide Provided
- Security Architecture Reviewed
- Monitoring & Logging Explained

Outcome

The complete AI hiring platform has been successfully handed over with documentation and deployment instructions.
