Improvement Recommendations

Objective

Identify enhancements to improve AI hiring accuracy, fairness, and scalability.

Scoring Improvements

- Balance HR and Technical score weights
- Reduce penalty for short but correct answers
- Introduce adaptive score normalization

Behavioral AI

- Improve gaze signal reliability
- Reduce dependence on webcam signals
- Incorporate multiple behavioral indicators

Decision Engine

- Add contextual reasoning
- Improve risk-adjusted recommendations
- Introduce confidence-aware thresholds

Machine Learning Enhancements

- Adaptive weight optimization
- Recruiter feedback learning
- Automatic threshold tuning
- Continuous retraining

Performance Improvements

- Parallel candidate evaluation
- Faster NLP processing
- Better caching strategy

Future Roadmap

- Live production validation
- Recruiter feedback integration
- LLM-assisted reasoning
- Reinforcement learning
- Explainable AI dashboards

Expected Benefits

- Higher decision accuracy
- Reduced false positives
- Reduced false negatives
- Improved recruiter confidence
- Better scalability
