Security Framework

Security Architecture

```
Candidate
     |
HTTPS API Gateway
     |
Authentication (JWT)
     |
Authorization (RBAC)
     |
AI Services
     |
Encrypted Database
     |
Audit Logs
```

Security Features

Authentication

- JWT Tokens
- OAuth (Future)

Authorization

Role-based permissions

Role	Access
Admin	Read, Write, Delete
Recruiter	Read, Write
Viewer	Read

Secure Storage

Data	Protection
Reports	AES-256 Encryption
Scores	Secure Database
Transcripts	Encrypted
Logs	Write-only Storage

Audit Trail

The following events are logged:

- Score generation
- Final decisions
- Candidate consent
- User access
- Report downloads

Future Improvements

- Zero Trust Architecture
- MFA
- Threat Detection
- Security Monitoring
