Zecpath AI Ethics Framework

Objective

To ensure the HR AI system operates in a fair, transparent, and responsible manner while protecting candidate rights and personal data.

Core Ethical Principles

Fairness

- No discrimination based on gender, age, religion, caste, ethnicity, or location.
- Candidate evaluation is based only on job-relevant signals.
- Equal scoring logic applied across all applicants.

Transparency

- AI decisions must be explainable.
- Recruiters can review score breakdowns.
- Decision factors are visible and auditable.

Accountability

- Every AI decision is traceable.
- Logs are maintained for audit purposes.
- Human review is available when required.

Privacy

- Candidate information is securely stored.
- Sensitive data is masked before scoring.
- Access is restricted to authorized personnel.

Candidate Consent Requirements

Before starting an AI interview:

Candidates must be informed that:

- AI will evaluate their responses.
- Their data will be stored and processed.
- Voice or audio may be recorded and converted into text.

Candidates must explicitly agree to:

- AI-based evaluation.
- Data processing.
- Storage of interview information.

Data Handling Policy

Data Type	Action
Resume	Stored securely
Audio	Converted to text
Personal Information	Masked before scoring
Interview Logs	Stored for audit purposes

Retention / Deletion Policy

Key Benefits

- Fair hiring process
- Candidate trust

- Transparent decisions
- Responsible AI deployment

Limitations

- Partial GDPR alignment
- Rule-based fairness checks
- No real-time bias monitoring

Future Improvements

- Real-time bias detection
- Automated fairness audits
- Explainability dashboards
- Continuous compliance monitoring
