Zecpath AI Monitoring & Observability Framework

Objective

Enable real-time monitoring, debugging, auditing, and performance tracking across the complete AI hiring pipeline.

Observability Layers

1. Logging Layer
    - API Logs
    - Model Logs
    - Error Logs
    - Decision Logs
2. Metrics Layer
    - Response Time
    - Throughput
    - Accuracy
    - Failure Rate
3. Distributed Tracing
    - Resume Parser
    - ATS
    - Screening
    - HR
    - Technical
    - Decision Engine
4. Alerting Layer
    - High latency
    - High error rate
    - Model accuracy drop
5. Dashboard Layer
    - Candidate statistics
    - Interview statistics
    - AI performance
    - Active alerts
