Aptitude AI Design – Zecpath AI

Objective

Evaluate candidate reasoning, problem-solving, and decision-making skills during AI interviews.

Core Components

1. Question Engine

- Logical reasoning questions
- Situational judgment scenarios
- Role-based cognitive questions

2. Answer Understanding Engine

- Extract reasoning steps
- Detect structured thinking
- Identify decision-making patterns

3. Scoring Engine

- Logical correctness
- Clarity of reasoning
- Completeness of approach
- Decision quality

4. Scenario Evaluator

- Compares candidate responses with ideal patterns
- Evaluates effectiveness of decisions

5. Output

- Aptitude Score (0–100)
- Reasoning Breakdown
- Strengths & Weaknesses

Evaluation Flow

Question ↓ Candidate Answer ↓ Reasoning Analysis ↓ Scenario Evaluation ↓ Aptitude Scoring ↓ Final Report
