AI Compliance Readiness Report – Zecpath

Objective

To ensure the HR AI system follows responsible data handling, privacy protection, and compliance best practices.

Data Retention Policy

Candidate information is retained for a maximum period of 90 days.

After 90 days:

- Data is anonymized, or
- Permanently deleted

Recruiters may request deletion at any time.

Compliance Standards Alignment

Standard	Status
GDPR	Partial Alignment
Data Minimization	Implemented
Consent Management	Implemented
Right to Erasure	Supported

Security Measures

- Encrypted data storage
- Secure API communication
- Role-based access control
- Audit logging enabled
- Controlled access permissions

Risk Assessment

Risk	Mitigation
Bias Risk	Fairness Review Checks
Data Misuse	Access Control
Model Errors	Human Review Process
Unauthorized Access	Encryption & Authentication

Explainability Requirements

AI decisions provide:

- Final score
- Score breakdown
- Hiring recommendation
- Strengths and weaknesses
- Reasoning behind decisions

Example

```
{
  "final_score": 78,
  "explanation": {
    "ats": "Strong skill match",
    "screening": "Good clarity and relevance",
    "hr": "High confidence and communication"
  }
}
```

Compliance Checklist

- Candidate consent collected
- Explainable scoring available
- Data masking enabled
- Data retention policy defined
- Secure storage implemented
- Audit logs maintained

Advantages

- Reduced legal risks
- Improved candidate trust

- Transparent hiring process
- Better governance

Limitations

- Partial GDPR alignment
- Limited real-time compliance monitoring

Future Improvements

- Automated compliance audits
- Real-time privacy monitoring
- Advanced governance dashboards
- Continuous policy validation

Conclusion

The Zecpath AI system demonstrates strong readiness for ethical and compliant deployment through consent management, privacy protection, explainability, and fairness-focused evaluation processes.
