Day 63 – Demo Dataset Creation

Zecpath AI Demo Dataset

Objective

Provide realistic sample data for demonstrating the complete Zecpath AI hiring pipeline.

Job Description

Backend Developer

Field	Value
Job ID	J101
Required Skills	Python, Django, REST API, SQL
Experience	2–5 Years
Education	B.Tech / B.E (Computer Science or related)

Candidate Profiles

Candidate C001 — Strong Candidate

Skills

- Python
- Django
- REST API
- PostgreSQL

Experience

3 Years

Projects

- E-Commerce Backend
- Payment API

Education

B.Tech Computer Science

Candidate C002 — Average Candidate

Skills

- Python
- Flask

Experience

2 Years

Projects

- Blog API

Education

B.Sc Computer Science

Candidate C003 — Weak Candidate

Skills

- HTML
- CSS

Experience

0 Years

Projects

None

Education

Diploma

Simulated AI Results

ATS Scores

Candidate	Score
C001	85
C002	65
C003	40

Screening Results

Candidate	Score	Summary
C001	80	Clear and relevant answers
C002	68	Basic understanding
C003	50	Incomplete responses

HR Interview

Candidate	HR Score	Communication	Confidence
C001	85	Strong	High
C002	70	Moderate	Medium
C003	55	Weak	Low

Technical + Machine Test

Candidate	Technical	Machine Test
C001	88	85
C002	70	65
C003	45	40

Behavioral Signals

Candidate	Behavior Risk	Integrity Risk
C001	Low Risk	Low Risk
C002	Moderate Risk	Low Risk
C003	High Risk	Moderate Risk

Purpose

This dataset is intended for:

- ATS Testing
- Screening Demonstration
- HR Interview Simulation
- Technical Evaluation
- Decision Engine Validation

- Stakeholder Demonstrations

Future Improvements

- Larger candidate dataset
- Multiple job roles
- Real interview transcripts
- Edge-case candidate profiles
- Industry-specific resumes
