Edge Case & Failure Handling – Zecpath AI

Objective

To ensure AI system stability under real-world unpredictable conditions.

Edge Cases Covered

Case	Handling Strategy
Missing Answer	Retry / Skip
Poor Audio	Ask repeat
Background Noise	Clean text
Language Mixing	Offer language switch
Incomplete Answer	Ask follow-up
Unclear Answer	Simplify question

Error Handling Strategy

1. Detect issue
2. Trigger fallback
3. Retry with limit
4. Skip if unresolved

Retry Policy

Retry Count	Action
1st Attempt	Retry
2nd Attempt	Simplify
3rd Attempt	Skip

Safety Features

- Prevent infinite loops
- Graceful conversation exit

- User-friendly prompts

Advantages

- Handles real-world noise
- Improves robustness
- Enhances candidate experience

Limitations

- Rule-based detection
- Limited multilingual support

Future Improvements

- ML-based noise detection
- Real-time language translation
- Context-aware fallback logic
