Hiring Report

Review Feedback

Module	Feedback
ATS	Good parsing, needs better semantic matching
Screening	Good intent detection, improve follow-up questions
HR AI	Good scoring, repetitive questions
Technical AI	Strong evaluation
Decision AI	Needs contextual reasoning

Issues Identified

Accuracy Issues

- Keyword dependency in ATS
- Short answers causing false negatives
- Behavior and performance mismatch

UX Issues

- Repetitive interview questions
- No instant feedback
- Long processing time

Performance Issues

- API latency
- Memory usage
- Timeout during high load

Conclusion

Zecpath AI is functionally complete. Main improvements required:

- Better contextual AI reasoning
- Faster processing
- Improved candidate experience
