Zecpath AI Screening System – Technical Documentation

System Overview

The AI Screening System automates candidate evaluation using:

- NLP-based answer understanding
- Screening scoring engine
- Behavioral analysis
- AI-generated reports

Architecture

User Voice Input ↓ Speech-to-Text ↓ Intent Detection ↓ Scoring Engine ↓ Behavior Analysis ↓ Report Generator ↓ Recruiter Dashboard/API

Core Modules

Module	Function
Intent Engine	Understand candidate answers
Scoring Engine	Evaluate answers
Behavior AI	Analyze confidence
Conversation Engine	Manage interview flow
Report Generator	Generate recruiter reports

API Flow

1. Candidate completes interview
2. Backend sends responses to AI
3. AI processes candidate answers
4. Structured report returned

Deployment Notes

- Docker containerization supported

- AWS/GCP deployment ready
- Logging enabled

Security

- Candidate data encryption
- Secure API endpoints
- Privacy masking supported
