Technical Evaluation Report

Candidate Information

Field	Value
Candidate ID	C3001
Role	Python Developer
Experience	3 Years

Overall Technical Score

Technical Score: 81.5 / 100

Decision: Strong Technical Fit

Skill-wise Breakdown

Skill	Score
Python	84
SQL	79
JavaScript	81
React	77
Node.js	82
System Design	74

Question Evaluation

Question	Score	Depth	Comments
Explain Python decorators	86	Deep	Strong explanation with practical examples
SQL Joins	80	Moderate	Correct but limited optimization discussion
REST API Design	82	Deep	Good architecture understanding

Explainable Scoring

Accuracy

Correct technical concepts were explained.

Depth

Candidate justified answers with reasoning and examples.

Logical Reasoning

Responses followed a structured thought process.

Real-world Applicability

Answers referenced production systems and practical implementation.

Strengths

- Strong technical fundamentals
- Good analytical thinking
- Structured explanations
- Production-oriented mindset

Weaknesses

- Limited optimization discussion
- System design needs improvement

Final Recommendation

Strong Technical Fit

The candidate demonstrates good technical knowledge, logical reasoning, and practical understanding. Recommended to proceed to the final interview round.

Future Improvements

- Add code execution evaluation
- Integrate LLM-based reasoning
- Include AST-based code analysis
- Support live coding interviews
