FINAL ATS EVALUATION REPORT

1. OBJECTIVE To validate the ATS system as a production-ready AI module.

2. DATASET

- 65+ Job Descriptions
- 100+ Resume samples

3. SYSTEM CAPABILITIES

- Resume parsing (PDF/DOCX)
- Semantic matching
- Scoring and ranking
- Shortlisting automation

4. PERFORMANCE METRICS Precision: 0.71 Recall: 0.71

Interpretation: The system shows balanced performance in identifying relevant candidates.

5. OPTIMIZATIONS IMPLEMENTED

- Resume caching
- Similarity caching
- Efficient processing pipeline

6. FAIRNESS & ROBUSTNESS

- Personal data masking
- Noise handling
- Input normalization

7. DEMO RESULTS

- Successfully ranked candidates
- Generated top candidate list
- Processed multiple JDs efficiently

8. CONCLUSION The ATS system is scalable, efficient, and suitable for real-world deployment.

9. FUTURE IMPROVEMENTS

- Add machine learning model
- Improve entity recognition
- Integrate API layer
